**\*\*Design for me功能強大**

Canva AI

一、製作影像

500點/月，一點4張。

二、草擬文件：魔法文案生成...excel

三、幫我撰寫程式碼\layout很漂亮

可調動API

## EX:倒數計時器

當計時結束時，播放以下的音效

[https://taira-komori.jp/~/media/2017/07/sound\\_os2/game01/coin05.mp3](https://taira-komori.jp/~/media/2017/07/sound_os2/game01/coin05.mp3)

再修改一次

1. 時間設定、開始以及結束時, 都要加上適合的音效, 建議使用 Web Audio API 創建。
2. 加上可以設定的10秒的按鈕

程式碼拿出來：

在檢視的網頁/按右鍵/檢視頁框原始碼/ctrl+A/ctrl+c

ctrl+V貼到記事本，再另存在html檔

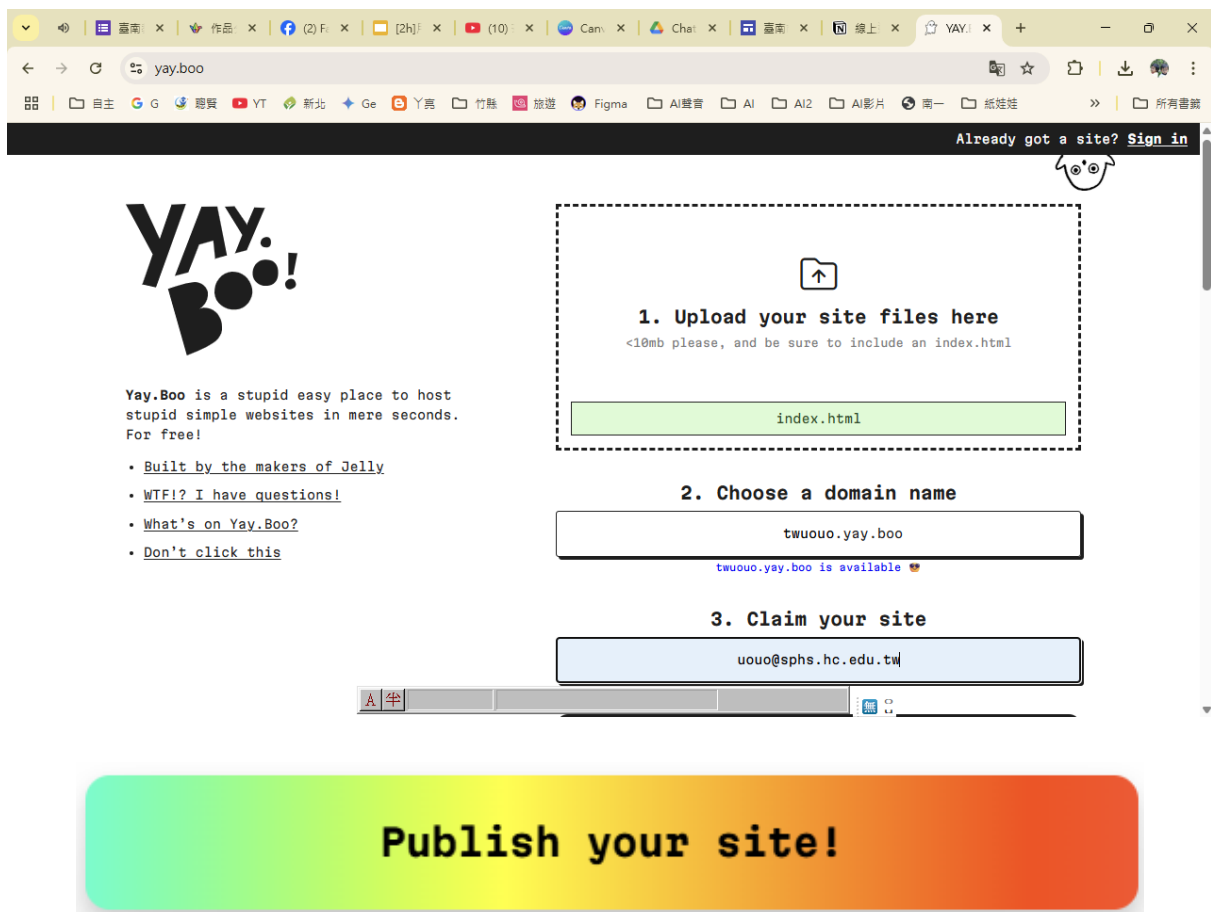

關掉，如何再看到我所做的計時器？

到Canva AI>撰寫程式碼

點選 選單「三>」，就可以看到你之前所做的。

## ex:亂數產生器

設定自己的網域：yay.boo

The screenshot shows the Yay.Boo website interface. On the left, there is a logo for 'YAY. BOO!' and a brief description: 'Yay.Boo is a stupid easy place to host stupid simple websites in mere seconds. For free!'. Below this, there are several links: 'Built by the makers of Jelly', 'WTF!? I have questions!', 'What's on Yay.Boo?', and 'Don't click this'. On the right, there are three main steps: 1. Upload your site files here (with a dashed box around the upload area and a file named 'index.html'), 2. Choose a domain name (with a text box containing 'twuouo.yay.boo' and a message 'twuouo.yay.boo is available'), and 3. Claim your site (with a text box containing 'uouo@sphs.hc.edu.tw'). At the bottom, there is a large, colorful button that says 'Publish your site!'.

**Holy shit, you made a site!**

Here's the link to your new wondrous creation:

[twuouo.yay.boo](https://twuouo.yay.boo)

We sent you a magic link to [uouo@sphs.hc.edu.tw](mailto:uouo@sphs.hc.edu.tw). Use it to sign in and manage your sites (customize the domain, edit the files, etc).
