

AI Vutuber實戰(亮亮老師)

講義：<https://aiavatarliang.netlify.app/>

研習影片

<https://youtu.be/xj6o76-p2GM?si=Cg7mrQGBrl6ih0-7>

1.AI虛擬角色製作完整教學教材<https://aiavatarliang.netlify.app/>

2.取代Veo3~地端生成VideoAvatar安裝教學

<https://chngeveo3wan2gp.netlify.app/>

資源1.開源Video-Avatar+<https://huggingface.co/spaces?q=HunyuanVideo-Avatar+>

2.Wan2GP官網<https://hunyuan.tencent.com/modelSquare/home/play?modelId=126>

1.Veo3生影片串起來

提示詞：

請幫我產生以下提示詞，我要產生一個影片，要包含聲音，內容是一個小女孩騎在牛背上，牛突然就飛到天空中去了。(產生後沒有聲音)

A heartwarming cinematic scene of a little girl riding on the back of a gentle brown cow. Suddenly, the cow starts flying into the sky like a magical creature. The background shifts from a peaceful countryside to a bright blue sky filled with soft clouds and sparkles. The girl laughs joyfully, her hair blowing in the wind. Add uplifting orchestral music, ambient countryside sounds at first (birds chirping, wind blowing), then magical wind and shimmering sound effects as the cow lifts off. Soft lighting, animated style.

attachment:2cca57c1-039d-458a-b935-109db4325572:Magical_Cow_Flight_Video_Ready.mp4

請幫我生成提示詞，要包含聲音配樂，內容為各式各樣的動物被外星人的飛碟吸上去，動物們都露出驚恐的表情與尖叫聲。風格要寫實。影片為3:2。

[attachment:a5c44fa2-8e21-44f5-9c91-1851e395241f:Alien_Abduction_Farm_Scene.mp4](#)

2. <https://hunyuan.tencent.com/>

3. <https://huggingface.co/spaces?q=HunyuanVideo-Avatar+https://huggingface.co/spaces/Vahe/AvatarVideoGenerator>

4. 地端：

WanGP AI影片生成工具教學>>教學網址：<https://chngeveo3wan2gp.netlify.app/>

WanGP是一套強大的地端AI影片生成工具，專為「GPU貧民」設計。這個工具能夠將文字或圖片轉換為動態影片，支援多種風格和功能。

安裝：anaconda><https://www.anaconda.com/>

<https://www.anaconda.com/download/success>

安裝git>><https://git-scm.com/>

<https://github.com/deepbeepmeep/Wan2GP.git>

cmd>>c:/vtuber>

1. git clone <https://github.com/deepbeepmeep/Wan2GP.git>
2. conda create -n wan2gp python=3.10.9
3. conda activate wan2gp
4. pip install torch==2.7.0 torchvision torchaudio --index-url <https://download.pytorch.org/whl/test/cu124>

pip install torch==2.7.8 torchvision torchaudio -index-ur1 <https://download.pytorch.org/wh1/test/cu124>

pip install -r requirements.txt

python wgp.py#預設Text-to-Video

沒有anaconda的方法

git clone

<https://github.com/deepbeepmeep/Wan2GP.git>

cd Wan2GP

```
python -m venv wan2gp_env          # 建立虛擬環境
wan2gp_env\Scripts\activate        # 啟動虛擬環境 (Windows)
# source wan2gp_env/bin/activate    # 若你是在 Linux / macOS，用這行
```

```
pip install --upgrade pip          # 更新 pip，避免版本錯誤
```

```
pip install torch==2.6.0 torchvision torchaudio --index-url
```

<https://download.pytorch.org/whl/test/cu124>

```
pip install -r requirements.txt
```

geek：可以完全刪除檔案。

GeekUninstaller 1.5.2.165 免安裝中文版 - 取代IObit Uninstaller的好用軟體移除工具

<https://www.azofreeware.com/search?q=geek>

問：老師，你這筆記用甚麼網頁或app做的呢？

答：Canva做好簡報>pdf>claude ai

「我給你教學講義，第一頁是主題，第二頁為作者資訊，第三頁開始為教學教材，我要你以這內容為教學教材，製作出一個精美優等的互動網頁型態簡報，記得，文字不要精簡。

附檔

claude ai會幫你開啟一個canvas>download a HTML>>netlify(githot要註冊90天)
(產生網頁)

網頁下載後要改成index.html，並將檔案放進一個資料夾中，上傳此資料夾。

方法一：

在netlify：

deploys(發佈)>可以再更新(可再回到claude ai再去跟它對話、修改)

改網址：在netlify中有一個Project configuration>change project name

另一種方法：<https://yay.boo/> (不能太複雜的網頁內容)
